

CMTL SMART

Inspection System

TYPE OF INSPECTION

Single camera level inspection

DESCRIPTION

This inspection system with SmartCamera is placed after the filler, when will pass a container will check if the level is within the range set during the creation of the format, and if it exceed the range the system will reject the container. This system is studied to be installed without any problem on every existing production line. The compact size of the system allow the user to access to the panel control easily. The format changeover is automatic with the possibilities to store a big amount of codes and recipes. The movement of the group is automatic thanks to a motor with electronic.

FUNCTIONS

- Detection of liquid's level and cap presence control.
- Set the maximum number of consecutive discard and give a signal to stop the other machines on the production line
- Activation of optical and acoustic signals in presence of bottle non-compliant

TECHNICAL DATA

| | |
|-----------------------|---|
| Power Supply | 230 Vac +/- 20% , 50-60 Hz, Monophase + Ground |
| Power consumption | 200 W |
| Protection | in accordance with EC |
| Weight | 25 Kg |
| Display | TFT 7" colour Touch Screen |
| Production Speed | from 5.000 up to 15.000 pcs/h |
| Operating Temperature | 0 - 45 C° |

DIMENSIONS (in mm)
